What is xPEPE?

xPEPE is le frog. He is the meme frog of our dreams who helps us express ourselves in times of dire sadness, bursts of happiness, or when we are feeling especially silly. xPEPE is representative of many complex emotions and xPEPE is there for us when we need a fren. xPEPE is tired of Gary, the SEC and the ripple case entirely. xPEPE is really sad the case is still on-going... and tries to hide it behind our many hats, accessories and visages.

We are a community driven project run by amateur artists and developers. We pride ourselves in organic community engagement and writing our own stuff from scratch. We hope you enjoy your time within this space and our community frens!

Why is xPEPE hanging on the XRPL?

We created this project for the community by the community because we are a part of it. When several pepe tokens spawned early on in the XRPL; followed by rugs we felt the need to fill the void with a solid project of xPEPEs within the XRPL. We aim to be transparent, friendly, and a safe place for all of our frens and family. With community decisions that help shape the future of the xPEPE project. We all play a valued role in matters large or small. The frens who have helped make us who we are and the future frens who will help us grow into something more... we thank and love you from the very bottom of our hearts!

Who makes up the xPEPE community?

xPEPE holders make up our community and they are held in high regard. Our project will remain loyal to the community who holds their xPEPE NFTs and have been rewarded with over a year's worth of distribution in PCSH & PXP. xPEPE holder's enjoy NFT gated community access to behind-the-scenes channels in our Discord server and exclusive NFT holder giveaways and perks! Holding your xPEPE NFT will allow you to continue to be included within the xPEPE community forever!

Then what is this xPEPE Project again?

The project is currently represented by the xPEPE NFT vol 1 collection. The very first art collection on the XRPL to be completely minted on the XRP Ledger using the XLS-20 standard, and the first collection to successfully begin burning their IOU tokens. xPEPE was freshly minted October 31st, 2022.. an hour or so after XLS-20 went live. The collection is currently still being minted with the IOU tokens fully distributed to the community. Our project does not hold a single xPEPE any longer as we patiently wait for our frens and the community to mint their IOUs. We will begin minting using XRP on June 1st, 2023.

More about xPEPE

xPEPE vol 1 is a generative art collection of 5,000 xPEPE's on the XRPL. There are over 200 hand drawn traits that can make up an xPEPE NFT . Each xPEPE is a unique and distinct personalized piece of digital art that exists on the XRPL. There are also 15 unique 1 of 1 xPEPE NFTs, hand drawn by xPEPE Link. xPEPE existed in the form of IOU tokens before the XRPL had the technology to support NFTs. The xPEPE collection is still actively minting on the xrpnft platform.

Each xPEPE NFT is mintable by burning .5 xPEPE IOU tokens on the xrpnft platform. xPEPE consists of 2,500 total IOU tokens & 5,000 NFTs. The xPEPE vol 1 collection was done with a bulk mint. Each of the 5,000 xPEPE NFTs were minted on the XRPL the first day XLS-20 went live and were transferred to the minter with the token assign function on the XRPL. For example: *When you mint the xPEPE NFT by burning your .5 IOU token the first time, you are assigned as the first minter.*

All of our traits are hand-drawn and done completely from scratch. Our collection is as unique & organic as the community which supports it. With a colorful array of silly hats and laser eyes to Trump, Spiderman and Musk xPEPE NFT renditions. The creativity and enjoyability of the xPEPE collection is unmatched. The rarities used were formulated and weighed with a script written by xPEPE Zep. We call this the "minimalist" rarity table. Each platform/marketplace that xPEPE is used to buy, and sell the xPEPE NFTs have received our custom rarity metadata for this collection.

How does one purchase an xPEPE token/NFT?

Set the trustline to hold the xPEPE IOU on your Xumm wallet

<https://xumm.community/?issuer=rw5e5krAvv1DrWyzmEr1NtNzg5jR26u5Gj¤cy=78504550450000000000000000000000000000&limit=5000>

Purchase the xPEPE IOU token by using one of the many dex's on the XRPL. Such as: The dex trade xapp in xumm wallet, sologenic, onxrp, xrplcoin, ect.

Buy an xPEPE NFT off of secondary markets such as: xrp.cafe, xmart, xrpnft, onxrp, ect.

xPEPE Tokenomics

- **Token distribution**

- 50 % - Airdrops*/Giveaways
- 20% - Development
- 15% - Marketing
- 15% - Founders

- **Royalties**

- 5.89% Royalty is collected from each secondary sale

*xPEPE tokens have been fully airdropped

Pixel xPEPEs = PXP Vol 2

PXP is the second collection of xPEPEs to be minted on the XRPL. PXP is a generative art collection of 9,589 xPEPEs in pixel form! When xPEPE Link spent hundreds of hours flying around and building on the metaverse Zerpcraft he found his love for pixel art renewed! This love transformed into an obsession and an idea to create the PXP pixel-art. This pixel art is very different than most pixel art collections and is a truly unique take on xPEPE. PXP NFTs are meant to be a gift to bestow upon the wonderful xPEPE community. With the majority of the total IOU token distribution airdropped to xPEPE & PCSH holders.

Each PXP IOU token when burnt will generate a PXP NFT with different traits, backgrounds, accessories, and features with several unique 1:1 PXP pieces to be found! With 300+ hand-drawn traits and different degrees of rarities each PXP will be unique and distinct from other NFTs and within the collection itself. Our community voted on minting this collection on the xrp.cafe platform. We have taken our time on this collection and aim to release PXP by the end of June 2023!

We will be lowering the PXP collection number of NFTs from 10,000 to 9,589 NFTs to ensure the entire collection will be minted. The project wallets will eat the remainder of the PXP IOUs in order to mint the collection out while allowing everyone time to turn their tokens into a PXP NFT!

PXP FAQ and Tokenomics

Set the trustline to hold the PXP IOU on Xumm wallet

<https://xrpl.services/?issuer=rPXPpTDcGL2zhNS2DFCbsep97H6sraTT7s¤cy=PXP&limit=10000>

Purchase the PXP IOU token by using one of the many dex's on the XRPL. Such as: The dex trade xapp in xumm wallet, sologenic, onxrp, xrplcoin, ect.

 - 25% PCSH Hodlers
 - 15% Giveaways/StaykX
 - 20% Marketing/Development
 - 15% Founders
-
- **Royalties**
 - 5.89% is collected from each secondary sale
-
- *PXP Tokens have been fully airdropped

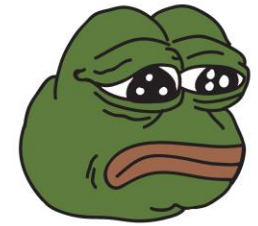

PCSH – PEPE Cash

PCSH is the official economy/meme token of our xPEPE community. Pepe Cash was made to be a dynamic token for everything within the xPEPE universe. From hodlers' rewards & micro transactions to exclusive NFT mints & voting purposes. We had big plans to use the PCSH for token gating/micro-transactions within the Zerpcraft metaverse. Unfortunately, Zerpcraft was nerfed due to Microsoft banning NFT support. We still have plans for PCSH as our project evolves and we find use cases for our economemetoken™! We distributed the PCSH token to our community over the course of a year and a half which concluded with the end of the StaykX pool in April of 2023.

The PCSH name was suggested in a discord giveaway event by the community and voted on by the community! The entire supply of PCSH will be given freely to the xPEPE community over time with different ways of distribution. So far, we have airdropped xPEPE holders, held giveaways, and rewarded Staykers on the StaykX platform.

More about PCSH

- PCSH is currently used for but not limited to:
 - Community Voting
 - Rewards-StaykX (complete)
 - Minting limited-release NFTs
 - Future Discount on physical merchandise
- PCSH has a total black holed supply of 589 Billion PCSH tokens. A large number allowing us to use the PCSH for multiple purposes. PCSH is burned when used for certain purposes and is deflationary
 - PCSHTokenomics
 - 70% Airdrop
 - 20% StaykX
 - 10% Rewards/Giveaways

PCSH FAQ

- [illegible]

XPEPE Fren Pass

The xPEPE Fren Pass NFTs will be mint-able using our PCSH currency. When an xPEPE Fren Pass is minted the PCSH used will be burned, forever decreasing the supply. The fren passes will NOT be tradeable. And only one wallet per mint that holds an xPEPE NFT.

We will be using the fren pass NFTs for:

Voting
Exclusive Airdrops
Special Events
PCSH Drip
+ More

Meet the xPEPE Team!

LINK

LINK IS A DEDICATED INDIVIDUAL HELPING SPREAD THE LOVE OF XPEPE'S AND MEMERY TO THE WORLD. HE HAS BEGUN HIS ART JOURNEY HERE ON THE XRPL. HE IS OUR ARTIST AND RUNS THE FRONT-END FOR THE XPEPE COMMUNITY WITH HIS FELLOW FRENS, THE OTHER XPEPE FOUNDERS AND ADVOCATES. HE IS CURRENTLY 32, HAS 3 WONDERFUL CHILDREN AND AN AMAZING WIFE WHO SUPPORTS HIS LOVE OF DIGITAL ART AND CRYPTO CURRENCY.

ZEP

A KEY FOUNDER OF THE XPEPE PROJECT HAS BEEN INSTRUMENTAL IN SHAPING THE PROJECT'S DIRECTION AND SUCCESS ON THE XRPL BLOCKCHAIN. AS THE PROJECT'S GO-TO DEVELOPER, ZEP OVERSEES DAILY OPERATIONS AND HELPS CREATE A VIBRANT AND CONNECTED COMMUNITY, DRIVEN BY A SHARED PASSION FOR MEMES AND THE PEPE CULTURE.

GILLY

XPEPE GILLY AKA GILLIAM IS KNOWN TO HIS FAMILY AS IAN OR DAD. GILLY HAS LONG HAD A LOVE FOR NFTS AND IS HAPPY TO HAVE FOUND A PERMANENT HOME ON THE XRPL. HE AND HIS WONDERFUL WIFE EACH BROUGHT 2 CHILDREN TO THEIR HAPPY FAMILY. GILLY FOCUSES ON PROJECT MANAGEMENT, COLLABORATION AND MARKETING.

Ok, then what is an NFT?

An NFT or Non-Fungible Token is a non-interchangeable string of data that is stored on blockchain and digital ledgers such as the XRP Ledger. NFTs can be videos, photos, audio files and all sorts of digital files. They use the blockchain to give verified ownership with public proof. We consider xPEPE not an NFT, but THE NFT 😊

Why the XRP Ledger?

Ripple Lab, founders of XRP and the XRP Ledger announced that it would be launching a 250- million dollar fund for creators of NFTs on the XRPL. This fund helped launch the XLS-20d standard which now allows us to support NFT operations such as tokenization, buying, selling, distribution of royalties, and to transfer artwork. With lightning-fast transactions, low transaction fees, decentralization, royalties to artists, scalability and many conspiracy theorists we found a home for our humble project.

- **Decentralization** - XRP was created to be a decentralized payment network.
- **Scalability** - Trades usually cost around 0.000012 XRP
- **Speed** - XRPL uses federated byzantine agreements (FBA), a consensus protocol which allows it to make a decentralized transaction in ~ 3 to 5 seconds.
- **Green** - XRP does not use intensive proof of work (POW) mining-based consensus and limited energy is required when using the network.
- **Royalties to Artists** - Built into transactions of secondary sales of NFTs upon the XRPL there are royalty fees that will help keep our project running long term.

Legal Disclaimer

The Pepe Green Paper is for informational purposes only. This document is a marketing document and not intended to be legally binding. Its purpose is limited to providing relevant information to determine the project's parameters and future objectives, and informing current and future xPEPEs about the risks for users when spending money on Blockchain and projects. xPEPE reserves the right to change or alter any information within this document. Potential holders of the xPEPE projects tokens/NFTs must understand and acknowledge the risks associated with blockchain technology along with any crypto-related Investments. We advise buyers to do your own research before buying. Potential buyers should analyze risks before purchasing any crypto currency, including xPEPE. These risks include but are not limited to the following; Policy Risk: constantly changing political and regulatory trends may lead to significant price volatility. Transaction Risk: the behavior of traders on the secondary market will always influence the price of xPEPE products. The secondary market for tokens that utilize blockchain technology has significant volatility, which may drastically affect the value of your xPEPE products. Technical Risk: blockchain technology is a rapidly developing technological field. Operational risk: may influence the success of the project or the underlying value of the tokens/NFTs. Potential xPEPE product buyers must realize this responsibility and conduct a rigorous and careful analysis. The introduction and description of the basic condition of the project in this document is an invitation to the general public. It is not a commitment nor a guarantee.
